

CENTRAL AND SOUTH AMERICAN.

DESTRUCTIVE FIRE AT ASPINWALL.

DISTURBANCES AT CHIRIQUI.

Prospect of Another Revolution in Peru.

The steamer Ocean Queen, Captain Conner, from Aspinwall April 1, arrived at this port yesterday. The following is the treasure list of the Ocean Queen:

FROM SAN FRANCISCO.	
Order.	\$500,000
Belmont & Co.	244,104
Lees & Walker.	208,000
Eugene, Kelly & Co.	68,000
Daniels, Morgan & Co.	65,000
Wells, Fargo & Co.	40,000
Moritz Meyer.	40,000
Total.	\$1,175,104
FROM ASPINWALL.	
Harley & Munro.	\$1,400
Mordley, Eno & Co.	180
Total.	\$1,580

COLOMBIA.

SPECIAL CORRESPONDENCE OF THE HERALD.

The Coming Conflict Between Church and State—Presumption of the Hierarchy—Another Revolution on the Isthmus—Destructive Fire at Aspinwall—Loss of Cars and Goods.

PANAMA, March 29, 1868.

It is true that "coming events cast their shadows before," the present conduct of the Roman Catholic hierarchy in several States of this Union indicates a fierce struggle between the civil and ecclesiastical governments, which will be accompanied by a sad retardation of the moral and material progress of the country, and may lead to very serious results. The importance of the matter induces me to enter a little more minutely into the details of recent developments, to which I have already briefly alluded in my last.

Ever since the overthrow of Mosquera, whose impetuous as well as his proceedings against the Church did not a little contribute to his fall, a reaction has set in which bids fair to carry things to the opposite extreme, and has already converted the Roman Catholic clergy into the aggressors. New instructions appear to have been received from Rome, and the bishops and priests who suffered under Mosquera's senseless persecution are evidently bent upon taking revenge on the administration which followed that crazy dictator. The first bold champion of the ecclesiastical party who stepped into the ring was the Bishop of Pasto, Dr. Garcia Tejada, a man of energy, who has had to suffer persecution and banishment from Mosquera. He had hardly returned to his see, towards the end of last year, he issued a circular to the clergy of his diocese, in which he set forth that all sales of church property and redemptions of pious mortgages or private property are null and void, according to the decrees of the Council of Trent, and the bulls of the actual Pope; that all persons engaged in those proceedings are under the ban of the Church, and that only he himself can redeem the property.

This extraordinary and very bitterly written letter, which violated in every particular the constitution and laws about mortmain, was communicated to the national executive by the local authorities. The President, General Acosta, comprehending the importance of the matter, and the fact that before Congress, in a message which was dated the 20th of February, Acosta had stated that it was his intention to call a law which explicitly provided for the abolition of the clergy to the laws of the country, and for the punishment of those who prove refractory. The message is accompanied by a copy of the mentioned circular, and by a letter from the highest civil authority in the northern division of the State of Boyaca, in which he complains of the violence of the clergy, and of the fact that the authorities and mediated with policies.

On the 26th the Attorney General addressed to the House of Representatives a long statement of his legal opinion about the case of the Bishop of Pasto, in which he clearly proved that the latter had violated the constitution, and that he could not act as accuser on the part of the country, because there was no specific law which explicitly provided for the punishment of the clergy to the laws of the country, and for the punishment of those who prove refractory. The message is accompanied by a copy of the mentioned circular, and by a letter from the highest civil authority in the northern division of the State of Boyaca, in which he complains of the violence of the clergy, and of the fact that the authorities and mediated with policies.

The message is accompanied by a copy of the mentioned circular, and by a letter from the highest civil authority in the northern division of the State of Boyaca, in which he complains of the violence of the clergy, and of the fact that the authorities and mediated with policies.

In regard to other political matters in the interior there is very little to report in this letter. Congress has just adjourned, and the President has just issued a decree, which is not very important. The President has just issued a decree, which is not very important. The President has just issued a decree, which is not very important.

The people on the Isthmus had lived in hopes of enjoying for some time the peace and tranquillity which had been the result of the late revolution. 120 to 130 pounds each had, up to the 19th inst., been sent down to the port. Of these 19,227 had been shipped.

Dr. Alex. von Franz, a German physician, who has resided many years in Costa Rica, will shortly publish a correct map of that country, with the assistance of Mr. Kurtze, formerly government engineer, and M. Felipe Valentini. These publications promise to be important for the science of geography.

The State of Nicaragua has rejected the agreement made by General Martinez with the house of Barclay & Co., of London, for settlement of claims. The British Secretary of Foreign Relations acknowledges the right of the Mosquitos to annex themselves to Nicaragua, according to the treaty of Managua of 1860.

A contract between the government and Mr. Edward Wortham, of Ohio, for the shipment of an "Agricultural Bank," with a capital of \$500,000, is also before Congress.

Nicaraguan papers speak much with gusto about the establishment of a new line of steamers on the Central American coast, in the Pacific. This line is to be opened by the North American Steamship Company, according to contracts made through their agent, Mr. Fitzgerald, with Guatemala, Honduras and Salvador, who engage to pay an annual subsidy for the service. The truth of the matter is that the company bought an old contract, which has been in existence for many years, and which is now being renewed. The company is to be opened by the North American Steamship Company, according to contracts made through their agent, Mr. Fitzgerald, with Guatemala, Honduras and Salvador, who engage to pay an annual subsidy for the service.

The principal article of export from Salvador used to be indigo; but, although this product is still cultivated in increasing quantities, another bid fair to become the main export of the country. This article principally goes to San Francisco and Panama, in both of which places it finds a ready market. There are at present at work in the mines of Salvador sugar machines, for the work is done by water power, more than one hundred worked by oxen and horses, and innumerable oil "trapiches," rude concerns, used by the lower classes of the population.

Guatemala, which is in certain respects a little behind the age, although materially progressing at the present time, has not yet introduced the use of sugar machines, for the work is done by water power, more than one hundred worked by oxen and horses, and innumerable oil "trapiches," rude concerns, used by the lower classes of the population.

Guatemala, which is in certain respects a little behind the age, although materially progressing at the present time, has not yet introduced the use of sugar machines, for the work is done by water power, more than one hundred worked by oxen and horses, and innumerable oil "trapiches," rude concerns, used by the lower classes of the population.

Prado to make an extensive survey of the Amazon. Last November he was at Iquitos, a little settlement on the Mayo, six hundred miles from Lima. He had been there for some time, and had been very successful in his work.

A great deal has been said about the gold washings of the Santiago river, near the boundary between Peru and Brazil. From a person who has recently arrived from that district, your correspondent has gleaned the following particulars:—There is no doubt of the existence of gold in the washings in large quantities, but the difficulties in reaching the locality are almost insuperable. A pass, which is now open, must be made, and the difficulties in reaching the locality are almost insuperable.

The country of the anthropophagi is reached, a land of savage cannibals, who are said to be very numerous. The difficulties in reaching the locality are almost insuperable. A pass, which is now open, must be made, and the difficulties in reaching the locality are almost insuperable.
